

### **Marathon Training Schedule - Novice**

1. It is assumed that you are in a routine of running three times a week and that you can already run 6 miles.
2. One of these runs should increase gradually over the weeks to build up your endurance and should be an easy run.
3. Run days are followed by rest/recovery days to allow your training to have optimal effect.
4. Periodically allow yourself a lower mileage recovery week.
5. Ideally, long runs are followed the next day by a lactic-busting “pootle” but this could also be a swim or lazy bike or even a brisk walk!
6. During the week feel free to mix it up with hills and efforts. We suggest the Thursday run is undertaken at race pace.
7. Please bear in mind this is a basic, generic schedule which, as such, may not exactly fit your specific needs. Feel free to tweak!
